

# 1 Modification of TALYS file 'code\_build.sh'

The gfortran flag '-mcmmodel=medium' was added because the TALYS build failed. The most probable cause is that the TALYS code allocated too much memory for the file name. The modifications are highlighted in yellow.

```
#!/bin/bash
#-----#
# Edited by Peter Karlsson; Date 12 May 2023
# Editing information: Added gfortran flag "-mcmmodel=medium" because build failed.
